UPVC WINDOW SYSTEM

WELCOME TO ECO FRIENDLY WORLD

Dear Customers

Welcome to excellent UPVC (Unplasticised polyvinyl chloride) windows system. The German Technology UPVC windows & doors fabrication done in this company. We introduced experience, good production team, accurate quality checking and time to time installation or service is our team work.

It is my pleasure to introduce our business operations through this letter.

It is my main ambition of business career that right from the beginning, to serve for the nation and run the business with energy efficient, saving the nature, reduce the global warming and minding the next generation.

Excellent engaging in the business for oriented machineries and accessories, and my ambition has been started by the way of replacing wood in making the clearer rollers for the textile spinning. Since it has not fully satisfied my ambition and on the continuous thinking, chosen the latest trend of UPVC windows as a technological advancement in the building and construction industry which is replacing the traditional wood and aluminum which will save the trees and energy, thus fulfilling my ambition in 2013 and took up a diversification in the business from industry.

It is very well proved that the UPVC windows and doors are having a good market potential in the building and construction industry worldwide.

Also it is very important to say that the growth of Excellent has been taken higher only by all your supports and wishes and I expect the same to continue in future from our all customers and business partners. We are proud to be an Indianized company and Let us support for “Make in India” and have a mutual long term business associated relationship.

SPECIALITY OF EXCELLENT UPVC WINDOW

HIGH SAFETY

High standard proven quality hardwares are used for windows and doors which is reliable for antitheft.

SOUND PROOF

A best in class framing system which incorporates any acoustic glasses with high sound transmission class enabling the window or doors to reduce.

CORROSION RESISTENCE

Excellent window system are terminate and corrosion resistant. Salts, acids, alkali and waste gases cannot corrode the window systems.

FIRE RETARDANT

During fire, once source of fire is removed, a carbonaceous layer is formed preventing supplying of oxygen and stops the spread

ENERGY SAVING

Low U values achieved along with low emissivity (low-E) glasses which reduces the conduction and radiation which results in low energy consumption which in turn gives a cost saving in energy bills.

HIGH WEATHERABILITY

High performance against to UV in any climatic conditions. The Unique dry blend formula ensures the resistance to discolor, disintegrate & degradation of surfaces exposed in both extreme temperatures.

MAINTENANCE FREE

The Harware's used are tested for multiple cycles to perform well for years together. The Fabrication quality is very well assured that the window and doors will be at your service without any hassles and built for endurance.

DUST FREE CONCEPTS

Our Windows are the most trusted for proper sealing which ensures that your interiors are well safe guarded from any kind of rough ambiances. This provides a clean and Healthy living protecting you from pollution.

POINTS TO REMEMBER FOR SELECTING A QUALITY WINDOW

Combination Window & Parts

Three Track Sliding Window Cross Section

Profile Quality

The chemical composition is very important for the discoloration and degradation of plastic surface.

Steel Reinforcement

The steel used is the nervous systems of the window or door. Bigger the steel chamber, stability of the system increases. Properly galvanized steel is to be used for longer run.

Hardware's

Suitable and tested hard wares makes the window a complete working system. Any substandard quality of hard wares results in failure of the window or door.

Glass

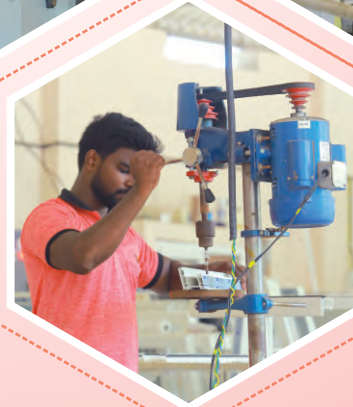

A very important component of a window or door because, glass takes the major responsibility in most of the factors like safety, visibility and energy efficiency. Choosing the right glass according to your requirement is mandatory.

Reliable Supply

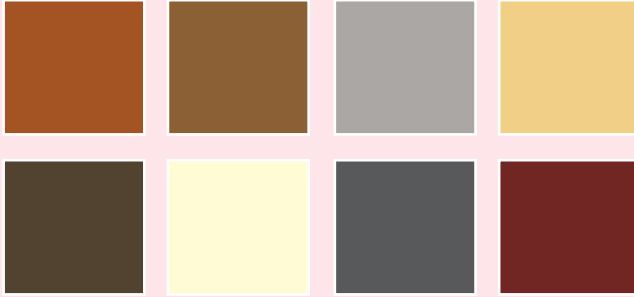

A reliable supplier to cater your needs following professional ethics and quality as policy is the one you can ever trust. Any craft work is based on workmanship. A double check on the supplier relating to product.

Installation

A professional installation of a door or window is always necessary to complete the product. Bad installation may lead to warpage, water leak, loss in energy and various other malfunctions.

Painting Colours

UPVC

(Unplasticised polyvinyl chloride)

This works as a very useful material used widely for doors, windows and pipelines these days. One very sure fact while using uPVC in the construction of doors and windows is it should be wrapped around a core made up of galvanized steel, and this galvanized steel makes uPVC much stronger and firmer.

Sample Description :
 ONE SAMPLE DESCRIBED AS UPVC PROFILE, WAS RECEIVED.
 Sampling was not carried out by Shriram Institute for Industrial Research. Samples details provided in the test certificate are based on declaration by the party.

S.No Tests	Results	Protocol Adopted
1. Resistance to Impact by Falling Mass (Using 1 kg falling mass after conditioning at -10°C for 1 hr.)	No break	DIN EN 477:1995-08
2. Water Absorption,%	0.04	DIN EN ISO 62:2008-05
3. Flexural Modulus, MPa	3062	ISO 178:2010
4. Vicat Softening Temperature, °C	84	ISO 306:2013
5. Behaviour After Ageing (At 150°C for 30 minutes)	No visual defects observed.	DIN EN 478:1995-08
6. Hardness Shore D	81	ISO 868:2003
7. Heat Reversion,%	1.4	DIN EN 479:1995-08
8. Density kg/m ³	1472	DIN 53479:1976-07
9. Thermal Conductivity, w/mk	0.16	ISO 22007- 2:2015

Note:- DIN EN ISO 62:2008-05 is used for determination of water absorption as the specified standard DIN 53495:1984-04 is superseded by this specification.
